Vista Energy, S.A.B. de C.V. (“Vista” or the “Company”) (NYSE: VIST; BMV: VISTA) reported today its financial and operational results corresponding to Q4 2024 and full year 2024.

Q4 2024 highlights:

- Total production in Q4 2024 was 85,276 boe/d, a 17% increase q-o-q and a 51% increase compared to Q4 2023. Oil production in Q4 2024 was 73,491 bbl/d, a 16% sequential increase, mainly driven by the tie-in of 25 wells between mid-August and early December, and a 52% increase y-o-y.
- In Q4 2024, the average realized crude oil price was 67.1 \$/bbl, a 2% decrease compared to the average realized crude oil price in Q3 2024, and a 1% decrease compared to Q4 2023, mainly driven by softer international prices.
- The realized natural gas price for Q4 2024 was 2.3 \$/MMBtu, a 3% increase y-o-y, mainly driven by higher industrial gas prices.
- Total revenues in Q4 2024 were 471.3 \$MM, 52% above Q4 2023, mainly driven by oil production growth. Total revenues were 2% above Q3 2024, reflecting a normalization of oil inventories from below-average levels in the previous quarter and linepack required for the Oldelval expansion pipeline. Net revenues during the quarter were 451.9 \$MM. Net oil revenues from sales at export parity prices, combining both international and domestic markets, were 316.1 \$MM, or 73% of total net revenues. Net revenues from oil and gas exports were 246.7 \$MM, representing 55% of total net revenues.
- Lifting cost in Q4 2024 was 4.7 \$/boe, 1% below the previous quarter, driven by the dilution of fixed costs due to production growth, partially offset by inflation in U.S. Dollars impacting peso-dominated expenditures.
- Adjusted EBITDA for Q4 2024 was 273.3 \$MM, a 5% decrease y-o-y, mainly driven by lower income from the Exports Increase Program, which was 8.9 \$MM in Q4 2024, down from 81.2 \$MM in Q4 2023. Adjusted EBITDA was 12% below Q3 2024, driven by lower sales volumes compared to production volumes, as described above, and additional trucking expenses. Adjusted EBITDA margin was 57%, 16 p.p. below Q4 2023 and 8 p.p. below Q3 2024.
- Net income in Q4 2024 was 93.8 \$MM, compared to 132.9 \$MM during Q4 2023, implying a quarterly EPS of 1.0 \$/share, mainly driven by higher depreciation, depletion and amortization. Adjusted Net Income during Q4 2024 totaled 22.1 \$MM, compared to 239.6 \$MM during Q4 2023, implying a quarterly adjusted EPS of 0.2 \$/share. This was mostly driven by a 146.5 \$MM interannual increase in Current income tax expense, from a benefit of 39.6 \$MM in Q4 2023 (in turn

driven by the devaluation of the Argentine peso against the U.S. Dollar in December 2023) to an expense of 106.9 \$MM in Q4 2024.

- Capex during Q4 2024 was 340.1 \$MM. The Company invested 251.3 \$MM in drilling, completion and workover of Vaca Muerta wells (mainly in connection with the drilling of 11 wells and the completion of 13 wells), 64.2 \$MM in development facilities, and 24.6 \$MM in G&G studies, IT and other projects.
- In Q4 2024, the Company recorded a free cash flow of 57.1 \$MM. Cash flow generated by operating activities was 369.5 \$MM, reflecting a decrease in working capital of 132.9 \$MM and advanced payments of midstream expansions of 26.7 \$MM. Cash flow used in investing activities reached 312.4 \$MM for the quarter, reflecting accrued capex of 340.1 \$MM, partially offset by a 33.6 \$MM decrease in capex-related working capital. Cash flow from financing activities totaled 451.2 \$MM ⁽¹⁾, mainly driven by proceeds from borrowings of 835.9 \$MM to finance 2025 development plan, partially offset by the repayment of borrowings of 339.7 \$MM.

(1) Inventory build-up of 0.28 MMbbl, resulting from a production of 6.76 MMbbl and sales of 6.48 MMbbl.

During Q4 2024, total revenues were 471.3 \$MM, 52% higher than Q4 2023 and 2% higher than Q3 2024. Net revenues from oil and gas exports during the quarter were 246.7 \$MM, representing 55% of total net revenues, which were 451.9 \$MM.

Crude oil net revenues in Q4 2024 totaled 435.4 \$MM, representing 96.3% of total net revenues and a 53% increase compared to Q4 2023, driven by oil production growth and partially offset by lower realized oil prices. On a sequential basis, oil net revenues increased by 3% compared to the 16% oil production increase, reflecting the normalization of oil inventories from below-average levels in the previous quarter and the commissioning of the Oldelval expansion pipeline, which required 70 Mbbl for the linepack. Combining both effects, 280 Mbbl of oil production were not sold during the quarter. Average realized oil price during the quarter was 67.1 \$/bbl, 1% below Q4 2023 and 2% below Q3 2024. During Q4 2024, the Company exported 56% of crude oil sales volumes at a realized price of 66.6 \$/bbl. Net revenues from the oil export market accounted for 56% of net oil revenues, reaching 242.8 \$MM. During the quarter, 38% of domestic volumes were sold at export parity-linked pricing, leading to 73% of total oil sales sold at export parity, combining sales to international buyers and domestic buyers paying export prices.

Natural gas net revenues in Q4 2024 were 15.2 \$MM, representing 3.4% of total net revenues. The average realized natural gas price for the quarter was 2.3 \$/MMBtu, a 3% increase compared to Q4 2023. Plan GasAr represented 34% of total natural gas sales volume, with an average realized price of 2.8 \$/MMBtu during the quarter. Sales to industrial clients represented 57% of total natural gas sales volume at an average realized price of 1.4 \$/MMBtu. The remaining 9% of total natural gas sales volume was exported at an average realized price of 6.5 \$/MMBtu.

NGL net revenues were 1.4 \$MM during Q4 2024, representing 0.3% of total net revenues. NGL average price was 360 \$/tn.

Lifting Cost

Lifting cost during Q4 2024 was 36.6 \$MM, a 16% increase q-o-q. On a per-unit basis, lifting cost in Q4 2024 was 4.7 \$/boe, 1% below the previous quarter, reflecting the dilution of fixed costs due to production growth, partially offset by inflation in U.S. Dollars impacting peso-dominated expenditures. On an interannual basis, Q4 2024 lifting cost per boe increased by 8%, driven by inflation in U.S. Dollars impacting peso-denominated expenditures and higher oilfield activity to accommodate current production and future growth, partially offset by the dilution of fixed costs as the Company continues to ramp-up production.

Selling Expenses

	Q4-24	Q3-24	Q4-23	▲ y/y	▲ q/q	2024	2023	▲ y/y

EBITDA = Profit for the year, net + Income tax (expense) / benefit + Financial income (expense), net + Depreciation, depletion and amortization + Transaction costs related to business combinations + Restructuring and reorganization expenses + Gain related to the transfer of conventional assets + Other non-cash costs related to the transfer of conventional assets + Impairment (reversal) of long-lived assets.

Adjusted EBITDA was 273.3 \$MM in Q4 2024, a 5% decrease compared to 288.1 \$MM in Q4 2023, which included 81.2 \$MM, accounted for as Other operating income, corresponding to the repatriation of 27% of export proceeds at the blue-chip swap FX, compared to 8.9 \$MM in Q4 2024. Excluding this effect, Adj. EBITDA grew 27% y-o-y.

On a sequential basis, Adjusted EBITDA decreased by 12% in Q4 2024, driven by lower sales compared to the production of the quarter, due to the normalization of oil inventories and linepack for the Oldelval pipeline expansion, and additional trucking expenses (as explained above). Adjusted EBITDA margin was 57%, 16 p.p. below compared to Q4 2023.

For the avoidance of doubt, any projection, guidance, or similar estimation about future results, performance, or achievements is a forward-looking statement. Although the assumptions and estimates on which forward-looking statements are based are believed by our management to be reasonable and based on the best currently available information, such forward-looking statements

are based on assumptions that are inherently subject to significant uncertainties and contingencies, many of which are beyond our control.

There will be differences between actual and projected results, and actual results may be materially greater or materially less than those contained in the projections. Projections related to production results, as well as cost estimations, are based on information as of the date of this presentation and reflect numerous assumptions, including assumptions with respect to type curves for new well designs and certain frac spacing expectations, all of which are difficult to predict and many of which are beyond our control and remain subject to several risks and uncertainties. The inclusion of the projected financial information in this document should not be regarded as an indication that we or our management considered or consider the projections to be a reliable prediction of future events. As such, no representation can be made as to the attainability of projections, guidance, or other estimations of future results, performance, or achievements. We have not warranted the accuracy, reliability, appropriateness, or completeness of the projections to anyone. Neither our management nor any of our representatives has made or makes any representation to any person regarding our future performance compared to the information contained in the projections, and none of them intends to or undertakes any obligation to update or otherwise revise the projections to reflect circumstances existing after the date when made or to reflect the occurrence of future events in the event that any or all of the assumptions underlying the projections are shown to be in error. We may or may not refer back to these projections in our future periodic reports filed or furnished under the Securities Exchange Act of 1934. These expectations and projections are subject to significant known and unknown risks and uncertainties, which may cause our actual results, performance, or achievements, or industry results, to be materially different from any expected or projected results, performance, or achievements expressed or implied by such forward-looking statements. Many important factors could cause our actual results, performance, or achievements to differ materially from those expressed or implied in our forward-looking statements, including, among other things: uncertainties relating to future government concessions and exploration permits; adverse outcomes in litigation that may arise in the future; general political, economic, social, demographic, and business conditions in Argentina, Mexico, and other countries in which we operate; the impact of political developments and uncertainties relating to political and economic conditions in Argentina, including the policies of the newly elected government in Argentina; significant economic or political developments in Mexico and the United States; uncertainties relating to the new administration that took office in Mexico in October 2024; changes in laws, rules, regulations, and their interpretation and enforcement applicable to the Argentine and Mexican energy sectors and throughout Latin America, including changes to the regulatory environment in which we operate and changes to programs established to promote investments in the energy industry; any unexpected increases in financing costs or an inability to obtain financing and/or additional capital pursuant to attractive terms; any changes in the capital markets in general that may affect the policies or attitude in Argentina and/or Mexico, and/or Argentine and Mexican companies with respect to financings extended to or investments made in Argentina and Mexico or Argentine and Mexican companies; fines or other penalties and claims by the authorities and/or customers; any future restrictions on the ability to exchange Mexican or Argentine Pesos into foreign currencies or to transfer funds abroad; the revocation or amendment of our respective concession agreements by the granting authority; our ability to implement our capital expenditures plans or business strategy, including our ability to obtain financing when necessary and on reasonable terms; government intervention, including measures that result in changes to the Argentine and Mexican labor markets, exchange markets or tax systems; continued and/or higher rates of inflation and fluctuations in exchange rates, including the devaluation of the Mexican Peso or Argentine Peso; any force majeure events, or fluctuations or reductions in the value of Argentine public debt; changes to the demand for energy; the effects of pandemic or epidemic and any subsequent mandatory regulatory restrictions or containment measures; environmental, health and safety regulations and industry standards that are becoming more stringent; energy markets, including the timing and extent of changes and volatility in commodity prices, and the impact of any protracted or material reduction in oil prices from historical averages; our relationship with our employees and our ability to retain key members of our senior management and key technical employees; the ability of our directors and officers to identify an adequate number of potential acquisition opportunities; our expectations with respect to the performance of our recently acquired businesses; our expectations for future production, costs and crude oil prices used in our projections; uncertainties

inherent in making estimates of our oil and gas reserves including recently discovered oil and gas reserves; increased market competition in the energy sectors in Argentina and Mexico; potential changes in regulation and free trade agreements as a result of U.S., Mexican or other Latin American political conditions; environmental regulations and internal policies to achieve global climate targets; the ongoing conflict involving Russia and Ukraine; and more recently, the Israel-Hamas conflict.
